Health & Population decline

Securing well-being in shrinking areas

Building the Future of Health – 1 June 2016

MSc. Maarten Vieveen – session 2
CITIZENS PARTICIPATION AND CONSERVING BUILT HERITAGE

MAARTEN VIEVEEN

PhD researcher

Energy efficiency in historical buildings
Wageningen University and Research HanzeResearch NoorderRuimte (HUaS)

Teacher

Research & Design, Historical buildings, Urban and rural planning
School for Built Environment (HUaS)
Past and current research

Adaptive reuse
Vitens’ industrial heritage

Source pictures: Vitens (not dated), Vieveen (2014)
Past and current research

Energy efficiency
Three case study projects

Source pictures: Vieveen (2013-2016)
Solutions are tailor made

Tensions in decision making

1. Heritage values:
   material and immaterial

2. Utility values:
   user preferences
Solutions are tailor made

*Decision making process*

- Participants (multidisciplinary)
- Discussing design problem & decision making criteria
- Integral tailor made design
Theoretical framework (a)

De Roo (2001)

Internal complexity

Central government

Multifaceted, flexible goals

Simple

Complicated

Complex

External complexity

Participatory interaction

Single set goal

Share your talent. Move the world.
Theoretical framework (b)

Netwerk Erfgoed & Ruimte (2014: 12)

Heritage approaches

Heritage-as-a-spatial-sector
Monodisciplinary perspective

Preserve as it is (meant to be) (19th century – present)

Source picture: Groninger Gezinsbode (1998)
Theoretical framework (b)

Heritage approaches

Heritage-as-a-spatial-factor
Multidisciplinary perspective

Exchange ideas – add value (1980s – present)

Theoretical framework (b)

Netwerk Erfgoed & Ruimte (2014: 12)

Heritage approaches

Heritage-as-a-spatial-vector

Interdisciplinary perspective

Guides developments (2000 onwards)
