Nutrition and the prevention of frailty

Dr. Harriët Jager-Wittenaar
Senior researcher Malnutrition / lecturer Nutrition and Dietetics
Program Leader Living Lab Clinical Malnutrition
Hanze University of Applied Sciences
University Medical Center Groningen
Groningen, The Netherlands

Innovation program in which researchers, lecturers, students, companies and health care institutes collaborate on multidisciplinary solutions for daily basis problems in health care, in the context of healthy ageing.

Major problem in context of malnutrition
- Underrecognition + inadequate diagnosis
- Lack of awareness
- Lack of knowledge
- High work load of professionals
- Treatment: responsive instead of proactive/preventive

Innovative solution
- Patient-Generated Subjective Global Assessment
