- Fach gruppe Physiotherapie in der Geriatric (Switzerland)
- Physiotherapy working with Older People (Turkey)
- AGILE (United Kingdom)
- American Physical Therapy Association Section on Geriatrics (United States of America)
International Association of Physical Therapists working with Older People

• IPTOP represents national special interest groups of physical therapists working with older people
• The association attempts to enable national organisations and their individual members to work with older people through research, evidence based practice, clinical specialisation and collaborative practice with other disciplines and carers
• The intention of the association is to be the international resource for physical therapists working with older people
Physical therapy for older people

• The prime purpose of physical therapists working with older people is to maintain and/or restore function, activity and independence. This requires a person-centred, collaborative, inter-professional approach to a wide range of conditions affecting this population.
IPTOP Aims

• To introduce participants to the work of IPTOP
• To explain IPTOP’s guiding principles
• To facilitate discussion, information sharing and initiatives that address the changing needs of older patients
• To provide models for best care practices → IPTOP Standards of Clinical Practice; IPTOP have published Standards of Clinical Practice for use by physical therapist clinicians practising with older people.

• A call to action – physical therapists working with older people
International Association of Physical Therapists working with Older People

- IPTOP website
- Every 3 month’s Skype meeting with representatives
- Every 2 years IPTOP meeting/conference
IPTOP’s Commitment

• The IPTOP Charter requests engagement in one or more of the following actions:
  1. Mobilize networks and partnerships
  2. Disseminate widely (IPTOP 8,000 members)
  3. Continue to partner with groups to advocate for health enhancing global PA
