Comparison of studies on relocation outcomes

Comparison	Number of studies in which the outcome of relocated residents was <i>equivalent</i> to pre-relocation	Number of studies in which the outcome of relocated residents was <i>higher</i> than at pre-relocation	Number of studies in which the outcome of relocated residents was <i>lower</i> than at pre-relocation
Outcome			
Mortality Rate	49%	30%	21%
Morbidity	55%	39%	7%
<i>Psychological and social statuses</i>			
Positive indicators	51%	27%	22%
Negative indicators	65%	22%	13%
